Marvin Jones Jr.

Postgame Press Conference

Broncos 23, Jaguars 13

MARVIN JONES Jr.: I think it was a common theme after that drive in the second and third quarters. It's just something we need to figure out and we have to find that energy and that spark and keep it. So yeah, I think that's what it was.

Q. When they're dropping that many DBs back, how much of an issue was it on the opening play just trying to get separation?

MARVIN JONES Jr.: I think we had early success and it impacted the way that they played. I think they changed and started going zone instead of going man. They did drop them back, but we still have to make our plays. Like I said, last week I feel like we all had a hand in it, and we just need to find a resolution and just keep pushing forward because when we do have those good drives, we're virtually unstoppable. We just need to be in that mode for four quarters, and I think the outcome is always going to be good.

Q. You described it as a lull in the offense; how did Trevor handle that lull?

MARVIN JONES Jr.: I think he always -- one thing that sticks out about Trev is he always has the same -- that same energy. It's tough; sometimes it's unexplainable. We don't want to be in those situations. But we just have to figure it out. He was even keeled in that first drive, and the same throughout the game, but we have to just find it and get better.

Q. Talk about your touchdown catch.

MARVIN JONES Jr.: It was a great throw, a great throw by Trev. He went into the huddle and was like, let's get it, and we got it. He placed it perfectly, and I did the easy thing and just ran under it and caught it.

Q. When you say "lull," can you be a little more

specific about what you're talking about? Is that mental, physical?

MARVIN JONES Jr.: Not necessarily mental or physical or anything, because the drive before, boom, we went out in our first -- I don't know how many plays it was, but we went right and scored.

It could be a mixture of things, just a penalty, field position where we start, if we back ourselves up a little bit. That always changes the play call, changes mentality and stuff like that, but we have to be an offense that nothing matters because you're going to go through the ebbs and flows of the game and we have to be the type of offense that if something bad happens, something is negated, it doesn't -- just water off the back. We have to really tune in and be the offense that we know we are and have some success.

Q. How close do you guys think you are to that?

MARVIN JONES Jr.: I think we're pretty close. You know, after this game, obviously our defense, they did a good job holding them, and we have to capitalize. But I think we're very close.

I think you can see what we could be as an offense if we do what we did for four quarters. I think we're really close. We have a good team, and I know just even judging off the locker room right now, we believe that we are a very good team, and nobody doubts that in our locker room.

That's all that matters, and we have to push forward and go from there.

Q. Building off of that, there were a few times today Trevor and the receivers had miscues, overthrows. Based on your experience what does the timetable look like for a quarterback and receiver to get to the point where --

MARVIN JONES Jr.: We'll get to that point, and that's the thing. We're still working through it, and that comes in practice, and that's not a problem because we have good plays in practice, and we just have to keep going. It's a process. Sometimes it's a process, and we did miss a few

ASAP . . . when all is said, we're done.®

between both of us, receivers and him, and that's something that we go and we correct it, and it's going to be great once we get it all figured out.

But I mean, as you can see, we had some great plays, we had some not-so-great plays, so that's not something that I am or anybody else is worried about. We'll get it done for sure.
