

# HSBC Women's World Championship

Friday, 30 April 2021  
Republic of Singapore  
Sentosa Golf Club

## Lydia Ko

### Press Conference

**Q. What do you think was going most right for you today?**

LYDIA KO: I holed some really good putts, especially on my front nine today. For the most part, I feel like the game has been pretty solid, not making too many mistakes and I think that's really important around here, especially it seems like some player is shooting a low one here and there. I'm just trying to keep up with the field, go with it, and just be aggressive and be confident when I'm out there playing.

**Q. This is definitely a gettable course, it seems. Is it the rolling conditions, or what makes it such a birdie-full course?**

LYDIA KO: First off, there's not as much wind, so I think for a lot of the pin positions, you can be pretty aggressive with. I think when you're on the green, even when it's 30 feet, the greens are rolling so good that you've got a good chance of holing them.

So I think the course just being in really good condition makes it a lot easier for us not having to judge, okay, is it going to bounce or what is it going to do. So from that point, it's I think just really nice to play a golf course like that.

**Q. Being consistent out here, you're still in contention, only three shots out of the lead at the moment. What does that do for your confidence heading into the weekend?**

LYDIA KO: I think I've just got to focus on my game and see where it takes me and keep playing solid and stay cool out there and see where I end up on Sunday.

**Q. It rained for a tiny bit today, and some people were coming off saying the rain didn't really cool us down; it turned into a sauna afterwards. Was that ever in the back of your mind of just dealing with even with more heat variables throughout day?**

LYDIA KO: Marina and I were like, do we need to bring out like a rain glove right now? I think when it was

## HSBC Women's World Championship

raining, it was pretty cold, but you know when it's over it's going to evaporate and become even hotter. I think you just have to think it's going to be humid out here, so I just take that into consideration, but I think for the most part today, we had a bit of cloud and especially on the front nine, I think we got off pretty good.
